FBI database links murders to serial killer

The Violent Criminal Apprehension Program's system is helping investigators fill in details of the 90 murders Samuel Little has confessed to.

Facial recognition shows big improvements

Gains in the accuracy of facial recognition technology over the last four years have been "revolutionary and not evolutionary," according to an expert from the National Institute of Standards and Technology.

Report: U.S. needs an AI strategy now

A national strategy for artificial intelligence will boost the nation's competitiveness, support defense capabilities and spur AI adoption, according to a recent report from the Center for Data Innovation.

How 'private-sector' technology shapes government administration

By applying the technologies used by successful business to their operations, agencies can improve efficiency, transparency and citizen satisfaction.
